

The benefits of **FASERFIX®BIG SLG** channels

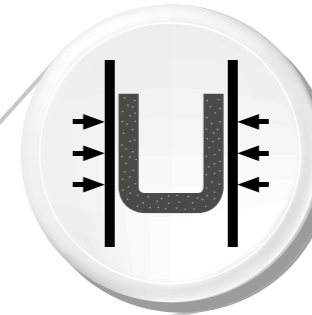

40 mm

Angle housings

FASERFIX®BIG SLG

- corrosion protection through KTL-coating
- 40 mm inlaying depth - extremely secure
- 8-fold bolting
- 8-fold shearing protection

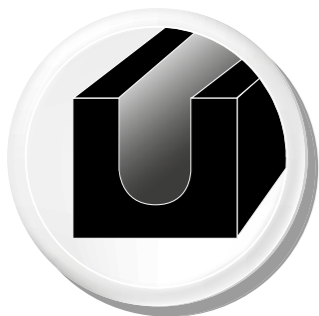

= **Security**

High-tech material

- „Made in Germany“: centralised production = one quality control system.
- Most used material on construction
- Optimum stability through fibre reinforced concrete
- Adheres well to foundation concrete (same coefficient)
- Installation without grating possible
- Fire resistance class A1 (not flammable) according DIN 4102
- Installation for asphalted surface up to class E 600 without concrete stretcher

= **Security**

Massive channel

- sits perfect in position

= **Security**

Robust concrete casings

FASERFIX®BIG SLG

- KTL-coated ductile iron surface
- integrated concrete runner saves casing during installation
- channels can be exposed to traffic immediately

= **Security / Cost savings**
